

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claim 1 (Currently amended): A laminated resin film ~~characterized by comprising:~~
at least one polyvinyl butyral film and at least one fluorine resin film which are laminated,
wherein the fluorine resin film is bonded to the adjacent polyvinyl butyral film using an adhesive.

Claim 2 (Currently amended): The laminated resin film according to claim 1, ~~characterized~~
~~in that~~wherein the at least one polyvinyl butyral film has a total thickness of 0.3 mm to 2.5 mm and
the at least one fluorine resin film each has a thickness of 0.05 mm to 2 mm.

Claim 3 (Currently amended): The laminated resin film according to claim 1 ~~or 2~~,
~~characterized in that~~wherein the at least one fluorine resin film comprises two fluorine resin films
each of which constitutes one of both sides of the laminated resin film.

Claim 4 (Currently amended): The laminated resin film according to claim 3, ~~characterized~~
~~by further comprising~~ an adhesive layer formed on each surface of the two fluorine resin films.

Claim 5 (Currently amended): The laminated resin film according to claim 4, ~~characterized~~
~~in that~~wherein the adhesive layer comprises an adhesive containing a silane coupling agent.

Claim 6 (Currently amended): The laminated resin film according to claim 1 ~~or 2~~,
~~characterized in that~~wherein the at least one polyvinyl butyral film comprises two polyvinyl butyral
films each of which constitutes one of both sides of the laminated resin film.

Claim 7 (Currently amended): The laminated resin film according to claim 1 ~~or 2~~, ~~characterized by~~ further comprising a fluorine resin film and a polyvinyl butyral film which are laminated.

Claim 8 (Currently amended): The laminated resin film according to ~~any one of claims 1 to 7~~, ~~characterized in that~~ wherein the fluorine resin film comprises a tetrafluoroethylene-hexafluoropropylene-vinylidene fluoride ternary copolymer.

Claim 9 (Currently amended): A laminated glass ~~characterized by the~~ comprising a laminated resin film according to any one of claims 1 to 8 comprising at least one polyvinyl butyral film and at least one fluorine resin film which are laminated, wherein the fluorine resin film is bonded to the adjacent polyvinyl butyral film using an adhesive
and two glass plates respectively laminated on both sides of the laminated resin film.

Claim 10 (Currently amended): The laminated glass according to claim 9, ~~characterized in that~~ wherein the two glass plates are made of soda-lime glass or borosilicate glass.

Claim 11 (Currently amended): A laminated glass comprising at least two non-tempered float glass plates and at least one resin interlayer film which are bonded, the resin interlayer film being formed of a resin ~~other than~~ non-silicone resin, ~~the laminated glass being characterized in that~~ wherein at least one of the glass plates is a non-tempered borosilicate glass plate.

Claim 12 (Currently amended): The laminated glass according to claim 11, ~~characterized in that~~ wherein the resin interlayer film is a tetrafluoroethylene-hexafluoropropylene-vinylidene fluoride ternary copolymer film.

Claim 13 (Currently amended): The laminated glass according to claim 11, ~~characterized in that~~ wherein the resin interlayer film comprises a polyvinyl butyral film and a tetrafluoroethylene-hexafluoropropylene-vinylidene fluoride ternary copolymer film which are laminated.
